Alpek Extends Average Debt Maturity, Strengthening Balance Sheet and Enhancing Financial Flexibility

Monterrey, N.L., Mexico. November 25, 2026 — Alpek, S.A.B. de C.V. ("Alpek" or the "Company") today announced further progress on its liability management strategy, extending its average debt maturity from 3.5 years to 5.1 years through recent refinancing initiatives and cash tender offers.

Alpek repurchased US$500 million in outstanding bonds at an aggregate discount to par of US$35 million, before transaction fees and expenses. As part of these transactions, Alpek also secured new bank financing at competitive rates. The resulting maturity profile aligns well with the Company's expected operating cash generation and provides greater flexibility to direct future cash flow toward debt reduction.

These initiatives follow S&P Global Ratings' recent upward revision of Alpek's outlook to "Stable", marking another positive development as the Company strengthens its credit profile.

Rodrigo Prieto, Alpek's CFO, stated, "We are taking concrete steps to strengthen our balance sheet and restore our investment-grade credit ratings. We remain committed to reduce gross debt over the short to medium term to increase our financial flexibility and support the execution of Alpek's long-term strategy."

About Alpek: Alpek is a leading petrochemical company in the Americas, with operations across three business segments: Polyester (PTA, PET resin, PET sheet and thermoform, and rPET), Plastics and Chemicals (Polypropylene, EPS, specialty chemicals and industrial chemicals), and Others which is comprised mainly by energy commercialization. Alpek is a leading global producer of PTA and PET, one of the largest producers of rPET and EPS in the Americas, and the only producer of Polypropylene in Mexico. In 2025, Alpek reported revenues of U.S. $6,585 million and Comparable EBITDA of U.S. $489 million. The company operates 30 plants in the United States, Mexico, Canada, Brazil, Argentina, Chile, Oman, Saudi Arabia and the United Kingdom, and employs more than 5,000 people.
